

## ST MATTHEW'S CHURCH OF ENGLAND PRIMARY PUPIL PREMIUM STATEMENT 2018 (APRIL)

For the financial year 2018-19 St Matthew's CE Primary School has been allocated £171,600.00 Pupil Premium funding. Primary schools receive £1,320 for each child registered as eligible for free school meals at any point in the last 6 years. Primary Schools receive £1,900 for Children who are Looked After.

Summary of the barriers to learning:

Deprivation - The school serves a community, which reflects extreme social and economic challenges. 86% of children eligible for free school meals (ever 6). The school's deprivation indicator is 0.44, which is more than double the national average of 0.21.

Behavioural, Mental and Social health and wellbeing needs- Many of our children and families have challenges with routines, parenting capacity, mental health, and managing emotions.

Diversity - 94% children from minority ethnic families, 69% speak English as an additional language. Some of the children need targeted support in order to catch-up with their peers in terms of language and oracy.

Start Points - Assessment on entry to the foundation stage, show many children have poorly developed communication skills, little or no English, poor personal, social and emotional development. Attainment on entry is substantially below developmental milestones for the majority of children. In 2016 baseline to Nursery showed 75% of children coming in below or significantly age related expectations in language and communication.

Mobility - the school has 79% mobility putting the school in the second from bottom quintile for stability.

	<p>learn important life skills, such as how to relate to others, how to work as a team and appreciate the rewards that come from working together.</p> <p><b>Patience</b> - In a world of instant gratification, learning to play an instrument is not something that can happen overnight. It is the daily efforts of everyday practice that can help a musician learn how to play without mistakes. Most musicians go through years of regular practice that includes daily musical exercises and the tackling of progressively difficult musical pieces, which in turn helps them conquer the virtue of patience.</p> <p><b>Resilience</b> - Choosing to take music lessons can help build confidence. Once you are aware that you are able to do something well, like play the flute for instance, you naturally become more confident of your skills.</p> <p><b>Achievement</b> - Extensive research done in this area has proved that children who learn to play a musical instrument do better in academics. Shaw, Rauscher, Levine, Wright, Dennis and Newcomb, explored the link between music and intelligence. They reported that music training is far superior to computer instruction in dramatically enhancing children's abstract reasoning skills, the skills necessary for learning math and science.</p>	<p>the Violin. Children have a weekly lesson with a specialist tutor and have access to a violin to take home to practice.</p> <p>All children in Year 4 have a weekly flute and singing lesson. Children who demonstrate an aptitude continue with flute lessons in Years 5 and 6.</p> <p>Children in KS2 have an opportunity to audition for the school choir, who are active within the local community.</p>	<p>Music Medal Exam, by the end of KS2.</p> <p>All children play, as part of their class assemblies.</p> <p>Termly concerts are held. Children have an opportunity to play together with older pupils.</p> <p>Increased musical skills for all children.</p> <p>Widen opportunities for all pupils to participate in whole school initiatives such as: performing in the school concert and attending the Symphony Hall to watch concerts.</p>

	<p><b>Improved memory</b> - Music and memory go hand in hand. Learning to play a musical instrument makes you use both parts of your brain and this in turn boosts memory power. Maestro Eduardo Marturet, found that participation in music at an early age could help improve a child's learning ability and memory by stimulating different patterns of brain development. Music education is also linked to higher IQ levels and the physical development of certain parts of the brain.</p>
